# CRIME HALTER pepper foam

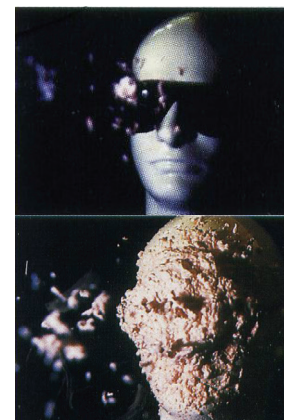

## What is Foam Pepper Spray?

Foam is excellent for blow-back protection and extremely reduced area contamination, and immediate saturation.

Any attempt to remove the product furthers the rapid break down into a liquid and drives the pepper further into the assailant's eyes and skin. In homes, shops, malls, restaurants, night clubs, or other crowded areas where a situation requires pepper spray, foam is the only way to go. Foam has an extremely low contamination area of only a few feet, where a large blast of standard pepper spray in the same area can affect several hundred square feet.

## Benefits of Foam

- Less Fumes
- Secure Indoors
- Sticks to Assailant
- Works Instantly
- Easy To Use
- Convenient to Carry

For a long time the most popular non-lethal self-defense product on the market has been the keychain pepper spray. What makes it so popular is that an individual is able to defend themselves when they are most vulnerable to being attacked- when they are getting into their car. With the pepper spray attached to a key ring it is readily available without even having to think about it. This made us ask "if the keychain pepper spray is so popular, why not offer a powerful keychain stun gun?" The result is the Streetwise S.M.A.C.K. (Stun My Attacker Compact Keychain) 16,000,000 Stun Gun. This amazing stun device is about the same size as a keychain pepper spray (measuring a mere 3.5 inches x 1.25 inches x .75 inches) and uses top quality components to give it more power than most of the stun guns on the market today.

**"NO MORE NICE KITTY"**

Here is why this CAT KNUCKLE may be the best one ever sold:

First of all is noticeably smaller than the other cat knuckles at only 2 inches by 2 1/2. Why is that important? Because the bigger it is, the less likely she is to carry it... Meaning that it will be the one that is there if somebody surprises you. If taken by surprise, even if she has a gun in the bottom of her purse, there is a possibility she wouldn't get to her in time. I have shown these to lots of people who snatched them up fast. You should without doubt carry these CAT KNUCKLES LUCKY 13. Optional Involuntary DNA collection, if they have it coming.

These OTF knife's handles and blades are precisely CNC machined for a very well put together knife. When you press the switch forward, the AUS-8 steel blade propels out with authority. After you release the blade, you'll find that the AUS-8 steel blade has a razor sharp edge and higher strength, hardness, and wear resistance than comparably priced knives.

# What is a Blowgun?

The blowgun has been used since the stone age. Though many scholars believe that it has been invented and re-invented throughout history by many cultures. It is best known as being used by the indigenous people of the Amazon, Southeast Asia, South America, and Central America. Throughout time blowguns have been used for hunting small game at short ranges. Because they can shoot extremely fast, up to 350 foot per second, and accurate, the hunter could get off multiple shots without scaring off the game. Some cultures even poisoned the tips of the darts in order to paralyze the target.

# EAGLE FLIGHT

Eagle Flight is our classic basic blowgun with darts. You get American quality, materials and craftsmanship and hours of shooting pleasure. Each blowgun barrel is carefully polished and deburred and electrostatically coated. Blowgun craftsmen then hand fit the barrel with quivers, grip and mouthpiece and other essential gear. Only after inspection can one be finally packed and certified an official AVENGER blowgun. No one else takes so much time and care as we do to make sure that your blowgun works right, looks right, and will give you years of shooting pleasure.

Our fire starter comes complete with a solid compact magnesium bar that can be used hundreds of times, or until the magnesium runs out. Simply shave some magnesium into a pile and easily spark the shavings (yes, even in wet or humid surroundings). The shavings will quickly spark into a flame so you can ignite larger pieces of wood.
